Card Sort Research

Caregiver Profile vs. Filter List

Elizabeth Kirschner — October 2022

Research Goals

- Determine what items are **most** important to have in a "Filter By" option on the "Caregiver List"

- Determine what items are important to have in a "Caregiver Profile"

Methods

- Card sort, n=19

- Participants sorted 49 cards provided by project collaborators into three groups, "Filter By", "Caregiver Profile", and "Other"

- Participants were a convenience sample from a class of graduate students at Claremont Graduate University

- Study was unmoderated and conducted remotely using Mural

- Participants were encouraged to create their own categories if they wished. Participant created groups were recorded as "Other".

Results
Selection Criteria

Standard Criteria

- **>50%** of respondents chose the category
- The percent difference in selections of "Filter By" and "Caregiver Profile" is **>25%**

Both Criteria

- The percent difference in selections of "Filter By" and "Caregiver Profile" is **<25%**

Uncategorized Criteria

- Items did no get **>50%** in either "Filter By" or "Caregiver Profile"

Results

Filter By: 7
- Adults
- Care Facility
- Children
- In-Home Care
- Infants
- Location
- Seniors

Caregiver Profile: 27
- Age
- Bathing
- Bathroom Assistance
- Behavioral Support
- Blood Sugar Testing
- Comfortable with Pets
- Companionship
- CPR
- Dressing
- Education
- Errands
- Feeding
- G Tubes
- Giving Injections

Results
Uncategorized

Results for these items is <u>inconclusive</u>, further research is recommended

- Housekeeping

- Long Distance Transport

- Memory Care

- Seizure Assistance

- Special Needs

- Specialized Care

- Specific Diagnosis

- Transportation

Limitations

- Participants were <u>not</u> screened

Unknowns:

- Relevance of service to participants

- Attitudes towards healthcare providers

- Knowledge of healthcare industry

Future Research

- Additional research to clarify inconclusive items

- Some participants broke up "Caregiver Profile" into subcategories, consider further investigation/benefits of implementing subcategories
